

Transana

Transana lets you analyze and manage your data in very sophisticated ways. Transcribe it, identify analytically interesting clips, assign keywords to clips, arrange and rearrange clips, create complex collections of interrelated clips, explore relationships between applied keywords, and share your analysis with colleagues. The result is a new way to focus on your data, and a new way to manage large collections of video and audio files and clips.

From: Chris Fassnacht and David K. Woods

Platform: cross-platform

Cost: \$50 single user/ \$500 multi-user - open source
